SUMMARY

B.E. graduate, An Aspiring Developer with practical experience in full-stack web development using FastAPI, Django, Flask, and React. Skilled in Python, SQL, and modern web technologies, with additional exposure to data analysis and process coordination. Adaptable and quick to learn, with a track record of building functional projects that solve real problems and improve user experience.

TECHNICAL SKILLS

Programming Languages: Python, HTML, CSS, JavaScript, SQL

Frameworks & Libraries: React, Fast API, Tailwind CSS, Express.js, Bootstrap

Databases: MySQL, Postgress, Supabase, MongoDB

Tools & Platforms: Git, VS Code, Excel (PivotTables, VLOOKUP)

Soft Skills: Problem Solving, Adaptability, Teamwork, Communication, Self-Learning

WORK EXPERIENCE

Keerti Education

Oct/25 – May/26

Computer Instructor

- Trained students in MS Word, Excel, PowerPoint, typing, internet basics, and computer operations.
- Taught **Advanced Excel** including formulas, conditional formatting, data validation, and basic data analysis.
- Delivered MS-CIT training through practical exercises and real-world examples.
- Assessed student performance, maintained records, and provided individual guidance to learners.

REDTAPE

Dec/24 – Jun/25

MIS Reconciliation

- Reconciled dispatch and return data using Excel (VLOOKUP, PivotTables) to identify discrepancies
- Generated weekly MIS reports for management review
- Coordinated return workflows across warehouse and customer service teams.

PERSONAL PROJECTS

[Milk Delivery System \(MDS\)](#)

React, FastAPI, PostgreSQL, Tailwind CSS

- Built a complete milk delivery management system with role-based access for admins and delivery partners.
- Implemented real-time delivery logging, automated billing calculations, and payment tracking by month.
- Created interactive DSR reports with Excel export using openpyxl.
- Mobile-responsive UI deployed on Render with a PostgreSQL database on Neon.

[Rush Hour Puzzle Game](#)

React, FastAPI, TypeScript, Tailwind CSS

- Built a full-stack sliding-block puzzle game with a custom FastAPI engine handling move validation, collisions, win detection, and variable board sizes with configurable exit positions.
- Implemented pointer-based drag-to-move with live preview across mouse, touch, and keyboard, plus a React Router SPA with per-level progress tracking and best-move stats.

Smart Task Generator (React + AI)

React, JSX, CSS, Groq API

- Developed a task generation web app using React, integrating the Groq API for AI-powered task suggestions.
- Implemented React Hooks and efficient state management, clean UI design, and seamless user interactions.

Beautiful Task Manager (React + Supabase)

React, Supabase, JavaScript TailwindCSS

- Created a modern Task management app with React and Supabase
- featuring real-time CRUD operations, user authentication and persistent storage.
- Designed intuitive dashboards with Task filtering, status updates, and live sync.

Hello Exam (Django)

Django, SQLite, Bootstrap 5, PythonAnywhere

- Developed an online exam and resource portal with secure login and dashboards.
- Implemented subject-based testing, result tracking, and content organization.
- Deployed a fully functional live demo showcasing end-to-end web development.

EDUCATION

A. P. Shah Institute of Technology

Bachelor of Engineering (Electronics & Telecommunication)
Honors in Artificial Intelligence & Machine Learning

Thane
2020 - 2024

RJ Thakur Junior College

Higher Secondary Certificate (Science)

Thane
2019-2020

CERTIFICATIONS

- AWS Academy Cloud Foundations
- AWS Academy Data Analytics
- JNCIA Training Internship
- Data Analytics Virtual Internship
